Art Unit: 1657

In view of the amended claim 2, the rejection under 35 USC §112 second paragraph is hereby withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 9-10 were rejected under 35 USC 102(b) as being anticipated by Furman et al.

Claims 1-4, 6, 9, 11 were rejected under 35 USC 102(b) as being anticipated by Goujon et al.

In view of amended claim 1, Applicant's arguments are deemed to be persuasive and the rejections are hereby withdrawn.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 1657

Claims 1-4, 6, 9-17, 19 were rejected under 35 U.S.C. 103(a) as being unpatentable over Goujon et al in view of O'Neill.

Claims 1-6, 9-17, 19 were rejected under 35 U.S.C. 103(a) as being unpatentable over Goujon et al. and O'Neill, and further in view of Sabelle.

Claims 1-4, 6-7, 9-17, 19 were rejected under 35 U.S.C. 103(a) as being unpatentable over Goujon et al and O'Neill, and further in view of Karlstrom.

Claims 1-4, 6, 8-20 were rejected under 35 U.S.C. 103(a) as being unpatentable over Goujon et al and O'Neill, and further in view of Stefanovic.

Applicant's arguments filed 10/12/2006 have been fully considered but they are not persuasive.

Applicant argues that O'Neill only teaches uses of anti-TK1 Mabs (an immunological method not a enzymatic method as claimed) for detecting high level of TK1 in cancer sample

It is the examiner's position that Fujiwaki et al. (Int. J. Cancer 2002;99:328-335; presented at the 37th Annual Meeting of the American Society of Clinical Oncology, San Francisco, CA, USA, 12-15 May 2001) teach an enzymatic method relating the activities of thymidine kinase to cancer progression (page 328, right column, 1st full paragraph, line 2; page 330, left column, 1st full paragraph; and Tables II on page 331 and Table III on page 332).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is

Art Unit: 1657

reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Conclusion

No claim is allowed.
